Use-Case Name: 3.0 – Maintain Calendar (Not Owned)

Description: This super-use case manages calendars that are not owned by the user. It is a subset of the master calendar. The functionalities of this case show the control of a viewer-only over a calendar.

Preconditions: The preconditions of the action varies according to which extension the action belongs to. The preconditions of each use-case extension is specified in its own use-case specification file. For a list of this use case's extensions, see Relationships section.

Flow of Events: The flow of events and its corresponding activity diagram depends on the use-case extension of the activity. See the use case specification of the use case extension for the said details.

Postconditons: Depends on the chosen action extension

Relationships: This is an extension of use case 2.0 – Maintain Master Calendar. This use case extends to the following use cases:

- 3.1 – Add Calendar
- 3.2 – Remove Calendar
