Use-Case Name: Use-Case 4.0 Maintain Calendar (Owned)

Description: This super-use case encapsulates the functionality a user has access over his/her own calendar. It deals with the editing of the current details of the calendar made by the user. It also involves the possible deletion of calendars a user has created.

Preconditions: The preconditions of the action varies according to which extension the action belongs to. The preconditions of each use-case extension is specified in its own use-case specification file. For a list of this use case's extensions, see Relationships section.

Flow of Events: The flow of events and its corresponding activity diagram depends on the use-case extension of the activity. See the use case specification of the use case extension for the said details.

Postconditions: Depends on the chosen action extension

Relationships: The use case extends to the following use cases:

- 4.1 – Edit Calendar
- 4.2 – Delete Calendar

Special Requirements: None
