for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2016-2017

Unique Reference:

The documents are stored in the https://github.com/dbrecuerdo/CS191-Project.

Document Purpose:

This document is to provide an overview of the functionalities and features of the project as well as a brief discussion of these.

Target Audience:

Any interested party in reviewing or knowing more about the project.

Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
09/30/16	Jairus John A. Garcia	1.0	Initial Document; Complete All Necessary Details

Use-Case Name: 4.1 Edit Calendar

Description: This use-case lets the owner delete a calendar. All events in the said calendar will be lost. The viewers can no longer view the calendar and it's events as well.
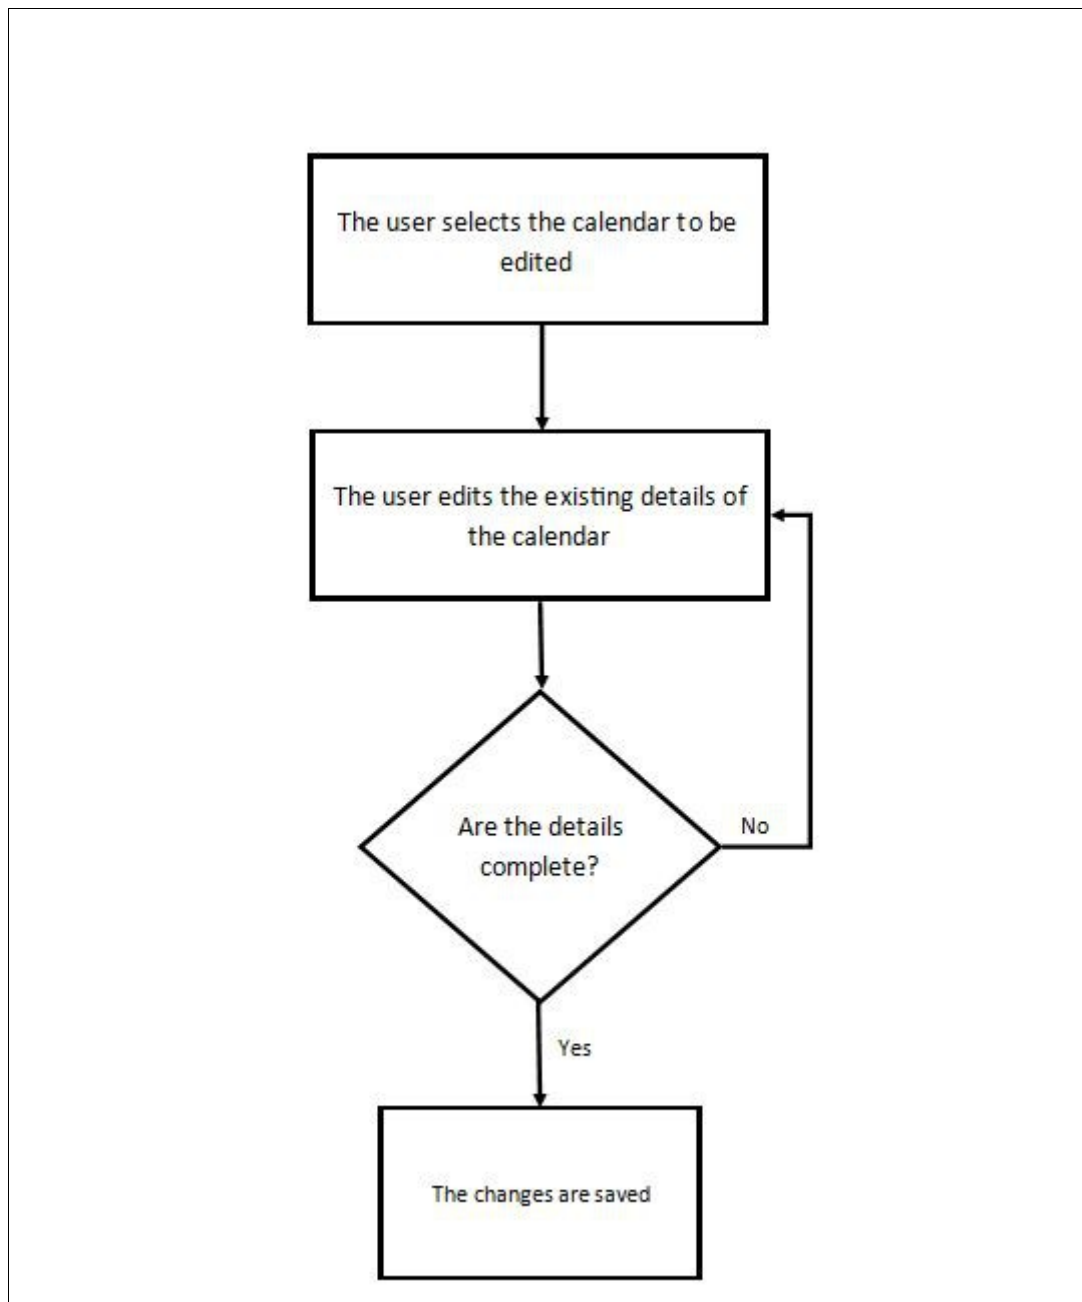

Preconditions: - The current user already has an account and is currently logged-in.
- The calendar to be edited must have already been created beforehand.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) The user edits the details of a calendar	1. User selects the calendar to be edited. 2. User edits the details of the chosen calendar. 3. If the details are complete, the user saves the changes.
Section 2 The user edits the calendar with incomplete details	1. User selects the calendar to be edited. 2. User edits the details of the chosen calendar. 3. If the details are incomplete, the user is prompted to complete it.
Scenario 3 The user cancels the editing	1. User selects the calendar to be edited. 2. If the user cancels the editing, no changes are saved.

Activity Diagram of the Flow of Events:

The user selects the calendar to be edited
