In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2016-2017

Unique Reference:

The documents are stored in the https://github.com/dbrecuerdo/CS191-Project.

Document Purpose:

This document is to provide an overview of the functionalities and features of the project as well as a brief discussion of these.

Target Audience:

Any interested party in reviewing or knowing more about the project.

Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
09/30/16	Jairus John A. Garcia	1.0	Initial Document; Complete All Necessary Details

Use-Case Name: 6.1 View Event

Description: This use-case happens every time a view master calendar case is performed. This allows the user to view the details of the event.
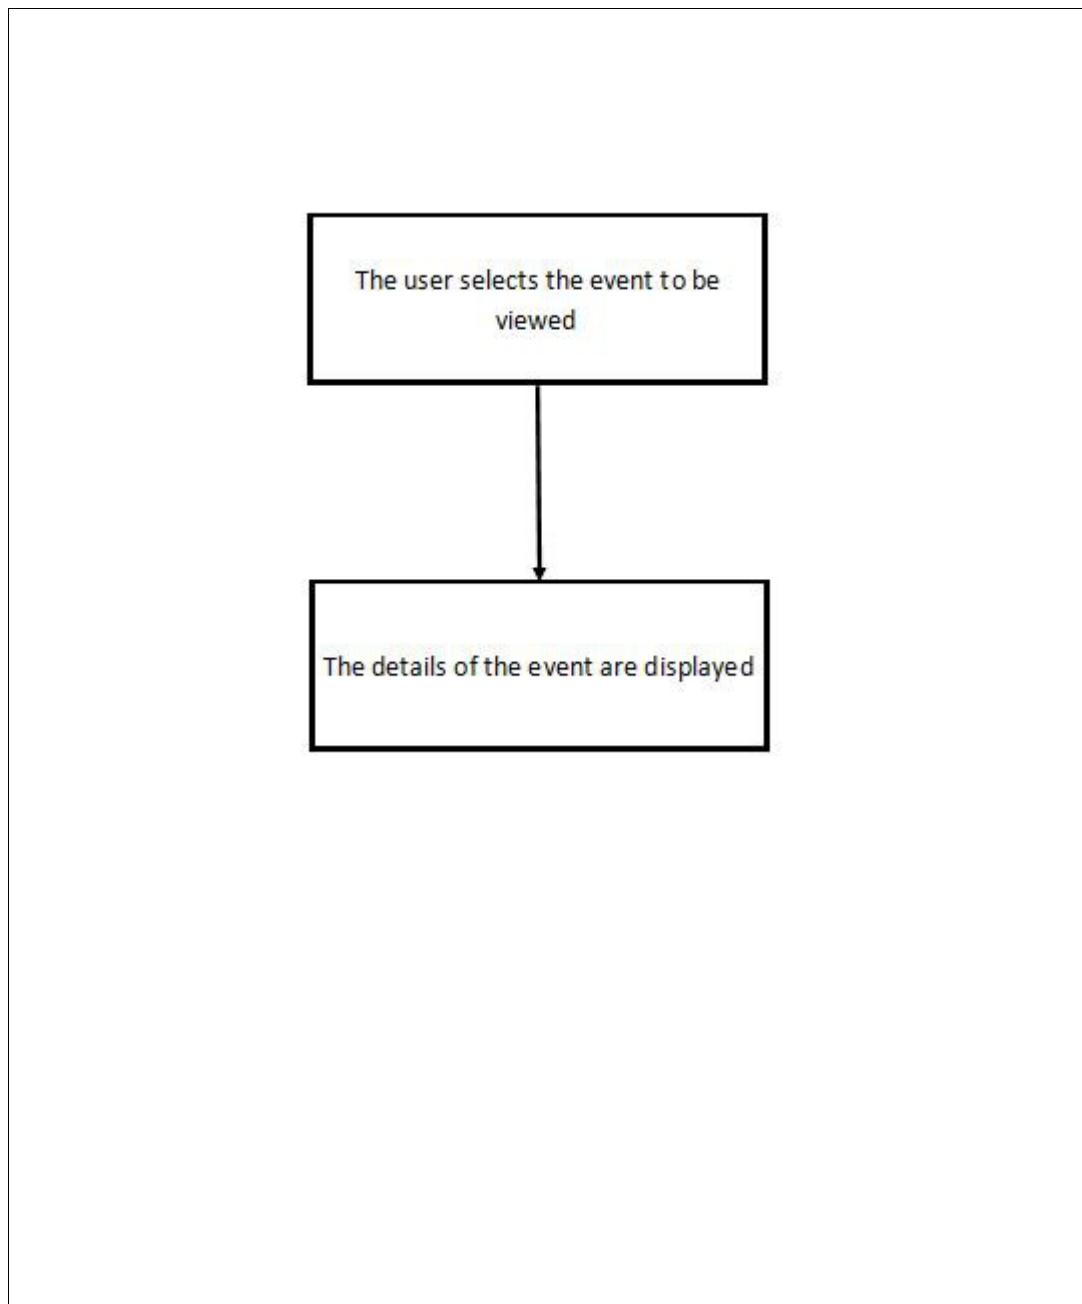

Preconditions: - The current user already has an account and is currently logged-in.
- The user has created and/or added calendars to his/her Master Calendar.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) The user views an existing event	1. The user selects the event to be viewed. 2. The details of the event are showed.

Activity Diagram of the Flow of Events:

The user selects the event to be viewed

The details of the event are displayed

Postcondition: NONE

Relationships: This is an extension of use-case 6.0 – View Master Calendar

Special Requirements:
NONE
